

Custom Configurations

Size, shape, and configuration are all up to you! Some of our custom options include faucet hole spacing and placement, extra holes for soap dispensers, matching side splashes, solid color bowls, plus much much more! Many of our products can conform to ADA standards. Give us your cabinet dimensions and preferred design details and we will apply our years' of experience and creative expertise to deliver the highest quality, longest lasting, hand-crafted products money can buy.

We also accommodate all standard cabinetry sizes with our line of Standard Vanity Tops.

Engineered Stone Products

Our Engineered Marble & Granite products are hand poured in Michigan, USA. These man-made products are composed of approximately 82% natural stone materials suspended in polymer resins which is then poured and molded into virtually any product you can dream up! A "gel coat" is applied during the manufacturing process that results in a high quality finish that will last a lifetime. Engineered Marble & Granite are our most affordable materials and have the benefit of being much easier to maintain than natural stone. As a result of being a poured and molded product, they are more versatile than natural stone in terms of the number of product options and applications.

Marble:

Magna Granite - Pebble

Onyx:

Engineered Onyx is a man-made product composed of specialty fillers derived from natural ore that's suspended in polymer resins, similar to our Engineered Marble, but with the unique characteristic of being semi-transparent giving the colored veins in the product a three dimensional look that has to be seen to be believed. This translucency also makes our Engineered Onyx capable of being back lit to provide a stunning effect with white, colored, or color-changing LED's.

White on White Onyx³ Skylight Blue & White Onyx³ Innocent Blush & White Onyx³ Ice Gray Onyx³

London Fog Onyx³ Cappachino Onyx³

Magna Granite:

Engineered Magna Granite is a rich series offering outstanding pattern consistency with the added vibrance of larger, more realistic textures.

Cobblestone¹ Gold Dust¹ Keystone¹ Copper Penny¹

Pebble¹ Boulder¹ Galloway¹ Oatmeal¹

Veined Granite:

Engineered Veined Granite is similar in composition to the rest of our Engineered Marble & Granite product line, but features much more intricate patterning that's nearly indistinguishable from its natural stone inspirations. With the elegantly patterned look of natural polished stone and the easy maintenance and affordability of engineered products, our Veined Granite product line combines the best of engineered and natural stone products.

Product Certification

US Marble is committed to quality. Our Engineered Marble/Granite/Onyx products are manufactured and hand poured in the U.S.A. Our products are certified to conform to HUD/UM 73a, ANSI Z34.1 and Z124 Standards, ICPE, through a program of factory inspection by Elite Global Testing.

Veined Granite - River Bottom

Regarding Engineered Marble / Granite / Onyx Products:

- Unless otherwise indicated, all colors are available in gloss and matte finish.
- For colors with a number after the name, the following notes apply:
 1. Gloss finish only - No matte finish available on these colors.
 2. Vanity tops using these colors require a solid color bowl.
 3. Solid color integral bowls are not available with Onyx vanity tops.

• Color-coordinated caulk is available in all of our 100+ colors, including our Evercor Solid Surface, Natural Stone Granite & Infinity Quartz products.

U.S. Marble Engineered Marble/Granite/Onyx products are manufactured using the MasterCast process. MasterCast engineered composites can successfully mimic the look of real stone while incorporating additional benefits such as custom shaping, design, and color.

Evercor is our nature inspired solid surface product line. The color and material composition of Evercor is the same throughout making scratches and scuffs easy to repair, keeping your surface looking new.

Unlike natural stone or grouted tile, solid surface is nonporous and does not readily accumulate bacteria, mold, or stains. Evercor is more heat resistant than our Engineered Stone, has high impact resistance, and is easily refinished making it tough enough for commercial applications.

Regarding Evercor Solid Surface Products:

- For colors with an asterisk after the name, the following notes apply:
 - * The veining present in these colors may vary from subtle to bold. Printed images are not large enough to represent the full pattern.
- Colors shown are for reference only – For accurate color representation, refer to in-store sample boards or visit www.usmarble.com.

Evercor Baroque **Solid Surface at its finest.** The Baroque collection offers a blend of colors with inspirational motion and dramatic intensity.

Infinity Quartz is approximately 93% crushed or ground natural quartz and 7% stain-resistant polymer resin. The resulting product is the most durable vanity top surface we offer.

Infinity Quartz is a low maintenance, versatile product combining many of the best features of natural stone and engineered stone products. Its nonporous surface is highly resistant to scratching, bacteria, mold, corrosion, and stains while never requiring the sealing that Natural Stone Granite demands.

All colors shown are for reference only – For accurate color representation, refer to in-store sample boards or order samples to take home.

Companion Colors:

1. Gloss finish only - No matte finish available on these colors. 2. Vanity tops using these colors require a solid color bowl.

Natural Stone Granite is a crystalline, igneous rock formed by extreme heat and pressure deep in the earth's mantle, and is considered to be the second hardest stone on Earth.

As such, it is extremely resistant to heat and scratches, and therefore very well suited to use for counter tops in the kitchen, bathroom surfaces like vanity tops, or virtually any interior design solution.

Regarding Natural Granite and Infinity Quartz Products:

Natural stone has many variations in color, crystal structure, mineral formation, and texture. Customers will be able to see and feel fissures and other natural differences in the stone's surface. These differences are not considered flaws, but rather signatures of authenticity.

Companion Colors... An engineered stone developed specifically to coordinate with natural stone products, and beautiful enough to stand alone.

Edge Finishes:

Enhance the style of your new vanity top with custom edges! Each material has its own unique edge choices, see above.

...and for your Tub and Shower:

Your shower / bath defines your bathroom. It is the focal point and it only makes sense planning the budget, look, and layout of your bathroom around it to make sure it's something that you're going to be happy with for today and all of your tomorrows.

With US Marble, your options are endless - let us help you create an Engineered Marble, Granite, or Onyx Shower or Tub that's as unique as you are.

US Marble Tubs and Whirlpools are available in all of our colors/materials except Natural Stone Granite, Infinity Quartz, and Evercor. We offer a range of styles and sizes to accommodate your space and tastes as well as matching Wall Panels and Skirts for Tub Surrounds, and Whirlpool Jets to maximize your bathing comfort.

Custom Shower Doors

Complete your décor with a custom enclosure from our wide variety of doors, glass textures, and hardware styles.
